Jean Fontenele

Full Stack Developer | React | Node.js | TypeScript

Phone: (21) 99007-4568 **Email:** jeancfsc.30@gmail.com
Address: Rua Escritor Rodrigo Melo Franco, No. 580, Barra Olímpica, Rio de Janeiro, RJ, Brazil

PROFESSIONAL EXPERIENCE

Company

TopSaude Hub — Grupo InterPlayers

Systems Analyst

I work in the DevOps operations area, using Azure DevOps, creating CI/CD pipelines, deploying applications to Windows servers with IIS, validating SQL objects in Oracle, and reviewing code through pull requests. This experience has strengthened my systemic understanding of the complete software development lifecycle.

Company

Condomínio Saint Tropez

Access Controller

Worked for nine years as an access controller in a high-standard residential condominium, performing activities related to the control of people and vehicle flow, as well as administrative practices.

PROJECTS

Full Stack Web Application Development

- Developed complete web applications using HTML, CSS, JavaScript, and PHP.
- Structured the back end with integration to relational databases, especially MySQL.
- Implemented dynamic features and front-end data manipulation.
- Applied best practices for code organization and separation of responsibilities.
- Used Git for source code versioning.

Social Network-Style Application — React + Node.js

- Developed a client-server web application using ReactJS and Node.js.
- Implemented communication with REST APIs for sending and retrieving data.
- Created reusable components and managed front-end state.
- Structured the back end for request handling and data persistence.
- Applied concepts of modularization and scalability.

Web Administrative Dashboard

- Developed an administrative dashboard for managing institutional content.
- Implemented CRUD features: Create, Read, Update, and Delete.
- Structured the interface with a focus on usability and information organization.
- Integrated the system with a back end for real-time data handling.
- Organized the solution to support future maintenance and evolution.

EDUCATION

Universidade Veiga de Almeida

Bachelor's Degree in Information Systems — In progress
Expected completion: 2025 to 2028

Associate Degree in Systems Analysis and Development
Period: 2023 to 2025

PROFESSIONAL SUMMARY

Full Stack Developer focused on React and Node.js, with experience building scalable web applications and integrating REST APIs. Practical experience with MongoDB and relational databases. Strong background in code organization, best practices, and version control with Git. Seeking opportunities in international projects and high-performance environments.

SKILLS

Front-end: ReactJS
Back-end: Node.js, REST APIs
Databases: MySQL, MongoDB
Tools: Git, GitHub
